Summary & Q&A

INTRODUCTION

I’m Mark, KE8BZW and I’ve been experimenting with D-STAR since 2019.

My first D-STAR radio was an ID-51A PLUS2 followed by an ID-5100A, an IC-705, and most recently, an ID-52A.

I’m hoping to inspire folks to get to know the capabilities of their D-STAR radios to join me on the air.

WHAT IS D-STAR

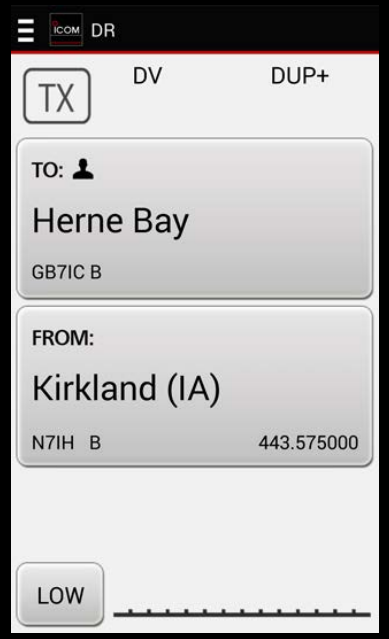

Digital Smart Technologies for Amateur Radio. It is an open standard digital communication protocol established by JARL (Japan Amateur Radio League) in the late 90’s.

Icom and Kenwood radios support it, along with some hotspots.

DIFFERENT TYPES OF D-STAR COMMUNICATIONS

SIMPLEX	LOCAL CQ	GATEWAY CQ	REFLECTORS	HOTSPOTS
Transceiver to transceiver with no repeater in the middle	Local repeater discussion, without use of Internet gateway	Repeater to repeater discussions	Like a chatroom for a local, regional, or global audience	A D-STAR mini-repeater that connects your station to gateways or reflectors

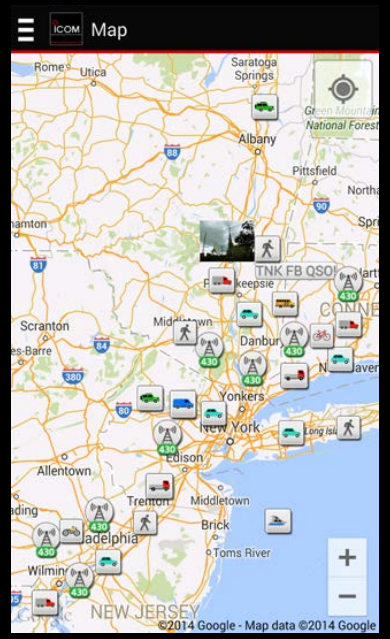

D-STAR CAPABILITIES

DR
Remote Control Software

SHARE PICTURES
Send/receive images

MAP
See repeaters and stations

TEXT MESSAGING
More subtle than voice

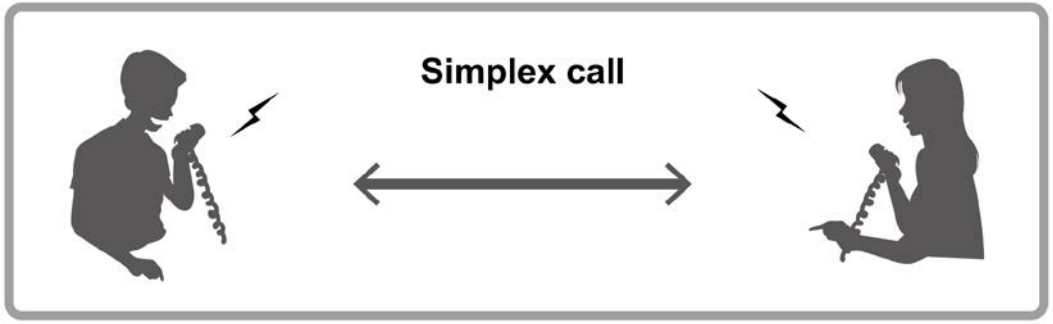

D-STAR SIMPLEX

After setting your callsign, simply tune to…

145.670

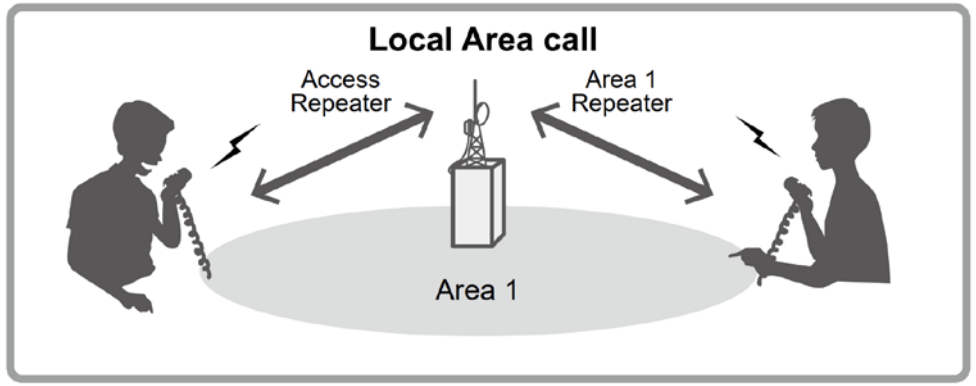

Enable DV mode

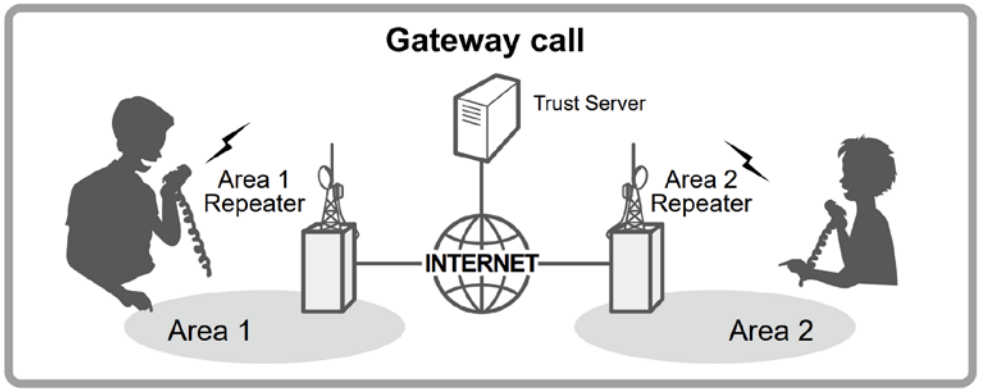

This is the National D-STAR Simplex Calling Frequency also try **145.600**, **441.000**, and **445.670**

REPEATERS: LOCAL & INTERNET GATEWAY

TO: CQCQCQ

FROM: W8CMH B

TO: N7IH B

FROM: W8CMH B

LOCAL D-STAR REPEATERS

W8CMH B/C	W8DIG A/B/C	W8LT B (Offline)
Repeater Detail http://www.dstarusers.org/viewrepeater.php?system=W8CMH DPLUS Dashboard https://w8cmh.no-ip.org/ (*Gateway Temporarily Offline*)	Repeater Detail https://www.dstarusers.org/viewrepeater.php?system=W8DIG **NOTE:** *C-node voice seems to be outbound only*	Repeater Detail https://www.dstarusers.org/viewrepeater.php?system=W8LT

GATEWAY REGISTRATION

Check here: https://regist.dstargateway.org/regcheck/index.php

Registration with a gateway is your key to long-range communications with D-STAR. If it's not working for you, check your registration above first.

Register here if you have no local registration gateway repeater: https://regist.dstargateway.org/Dstar.do

1 — Gateway Repeaters

2 — Terminal Mode

(IC-705 or RS-MS3A / RS-MS3W app with cable)

3 — Doozy

(Windows app by PA7LIM)

4 — D-STAR Hotspot

GATEWAY CQ

TERMINAL / HOTSPOT GATEWAYS

APPS & SOFTWARE

Built-in to the IC-705

RS-MS3A app for Android

Doozy app for Windows

Free (TANSTAAFL)

Uses existing processors in existing device

HARDWARE HOTSPOTS

A microprocessor that interfaces RF to the D-STAR network

A separate device

Separate power supply

Updates and configuration

Often cross-mode

REFLECTORS

REF001C	REF030C	REF038A	REF038B
D-STAR's MegaRepeater (Worldwide) 🌐	Southeastern US	The Ohio Reflector	NODIG Permalink

SOURCE: http://www.dstarinfo.com/Reflectors.aspx

CROSS-MODE

D-STAR users can speak cross-mode via URF Multiprotocol Gateway Reflector Server (URFD).

One example with great set-up instructions and support is:

https://hrcc.link/instructions.html

They also have a weekly net at **9:30 PM Eastern**.

NOTE: *Local repeaters support REF reflectors – you'd need to use Terminal Mode, Doozy, or a D-STAR Hotspot.*

SUMMARY

If your radio supports D-STAR why not make some time to get to know the features so you can build your skills in a digital mode designed by hams specifically for hams?
